

Jetpack Adventures

By mixing the finest environmentally safe technology with the most spectacular scenery, a trilogy of outstanding activities, which combine air and water, was created. At the same time a new kind of adventurer was born; they are called the “aqua-riders”. Become one of them, master all four activities and ride with the wind... that is... if you dare!

Hoverboard

The sun shines and the temperature increases; the ocean breeze cools down your skin, the people throughout the beach watch breathless while you fly across the sky, curling and meandering in a small board boosted by the only power of water. That’s the way it feels to control a **Hoverboard** at the awe-inspiring settings of Cancun. The turquoise blue waters of the Caribbean will be your highways in this incredible adventure that is fun as it is safe. It’s that simple! Just listen to your personal pilot’s directions; buckle up your lifejacket and get ready to fly over the ocean like a sea hawk with the wind as your only companion.

RIVIERA MAYA PRICES
